

# abhishek rein

I create human-centered eye candy.

Fixated on creating the best user experiences, I've spent the time developing the research, design and testing skills required to instantly let you know the perfect ingredients to decipher your problems and guide you through the process of solving them. Feel free to reach out to talk about design, computers, Japan, or just to debate on random philosophical subjects.

## education

**University of Petroleum and Energy Studies**

GPA 9.55

B. Des in Interaction Design • 2019 - 2023
